

Guide des tailles – Bottes Sergio Grasso

Toutes les mesures sont en centimètres.

1

Trouvez le tableau de votre pointure.

2

Mesurez votre hauteur de mollet (pieds nus, assis, de la pliure arrière du genou jusqu'au sol) et votre tour de mollet (au point le plus fort, sur les vêtements portés habituellement).

3

Choisissez la colonne dont la hauteur et le tour de mollet se rapprochent le plus de vos mesures : c'est votre taille de mollet.

Taille à commander = votre pointure / Mollet : le code de votre colonne (ex. +1, NE, H...) Exemple : pointure 41, hauteur 44 cm, tour 36,8 cm → taille 41 / Mollet : +1

Size guide – Sergio Grasso boots

All measurements are in centimetres.

1

Find the table for your shoe size (EU).

2

Measure your calf height (barefoot, seated, from the back of the knee to the floor) and your calf circumference (at the widest point, over the clothing you usually ride in).

3

Choose the column whose calf height and circumference are closest to your measurements: this is your calf size.

Size to order = your shoe size / Calf: the code of your column (e.g. +1, NE, H...) Example: shoe size 41, calf height 44 cm, calf circumference 36.8 cm → size 41 / Calf: +1
